

Our Mission

Service

Providing the optimal mix of expertise, technology and effort to attain the best medical outcomes in the most efficient manner.

Honesty

Being complete in our communication and consistent in our actions. Serving as advocate for the patient while remaining vigilant in consideration of our clients.

Dedication

Aquiring the knowledge and experience that serves to maximize our abilities. Implementing our abilities in support of the human animal bond and its inherent joy.

Compassion

Understanding the physical and psychological state of our patients. Empathy for their pain and the diligent pursuit to lessen their suffering.

Veterinary Hospital

*Serving With Honesty,
Dedication and Compassion*

Physical Exam

A complete physical exam is key to successful, efficient medicine. Typically this includes a series of measurable parameters such as weight, temperature and heart rate. In addition, objective assessments are performed such as palpation (feeling) of the abdomen and limbs, visual examination of eyes, ears, teeth and coat. Client observations and history are considered a key component of the physical exam.

Laboratory

Timely and accurate information often makes the difference in the treatment of your pet. We pride ourselves in having the latest technologies in blood chemistry and blood cell analysis for rapid in-house evaluation. Our doctors are well versed in microscopic evaluation and our skilled lab technicians provide accurate, consistent testing. Our capabilities are further supplemented through a network of trusted outside laboratories.

Imaging

Our state-of-the-art digital radiology suite allows us to acquire radiographs (x-rays) of superb quality quickly. This efficiency helps create a seamless flow from diagnosis to treatment of even the most difficult or extensive conditions. In addition we have ultrasonography to assist in diagnosis and treatment. As in all realms of modern medicine, technology is ever improving and we are constantly evolving as well.

Our doctors

Dr. Frank Wuest and Dr. Bryna Frye share a passion for high quality, logic driven medicine. Special interests include orthopedics, surgery, dermatology, ophthalmology and reproductive medicine with an emphasis on preventive care.

Our Staff

Cornerstone to our care is our staff. It is their deep compassion for our patients and commitment to our clients that facilitates our continued success.

Family

We at Blue Skies are not just co-workers, we are extended family. We are confident you will appreciate the difference.
